ARTWORK INFORMATION

Artwork Uploads

During the order process you will only be asked about printing types, colours and locationts, you will not be asked about your artwork itself. Once you have ordered and checked out you will then be able to upload your artwork through our upload service. (https://inkee.artworker.io/). This sends your artwork directly to our studio who will then comunicate directly with you about it if required. If you need the studio to amend or create artwork you will nedd to use our artwork credit system.

Artwork Credits

At Inkee, we use a credit-based system for purchasing artwork from our studio. Here's how it works:
1 credit equals £10. Once you receive your quote from the studio, you'll know the number of credits required for your project. The credit amount is determined by the job's complexity. For example, simply applying your existing *logo to a feather flag would cost 1 credit (£10), while designing a double-sided flyer from scratch might cost 4 credits (£40). *(Logo provided by you in line with our artwork requirements guidence)

Examples:
- Standard Letterhead: 2 credits (£20)
- Standard Leaflets: 4 credits (£40)
- Flag Design: 1 credit (£10)

Artwork requirements

Files are recommended to be supplied in a PDF format.
Please check the following when you create your PDF (all programs)

Artwork is high resolution (300dpi)
All images are embedded and fonts either embedded or converted to paths (outlined).
The job contains no RGB images.
The job contains the correct number of colours to print.
Bleed is set to a minimum of 3mm on all edges where bleed is required.
All text and logos are 5mm away from the trim edge, unless they are intended to run into the bleed.
Folded items are supplied as spreads to view.
Multi page documents are supplied in single pages and in page order.
All documents have crop marks.
With each file name including the finished dimensions and a description. (eg. "3m x 1m Description.pdf")
